

SEWANU ISAIAH

Backend Engineer · Python · TypeScript

is.sewanu@gmail.com · +234-802-228-7813 · Lagos, Nigeria · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL EXPERIENCE

Junior Software Engineer · Vittas (Techstars '22) · Remote

May 2026 – Present · Full-time

- Developed a drop-in payment UI package similar to Stripe, incorporating secure API design and encrypted credential storage.
- Built a role-based access control system across backend and frontend for admin platform security and user governance.

Software Engineer Intern · Vittas (Techstars '22) · Remote

Dec 2025 – May 2026 · Internship

- Designed and implemented a multi-tenant architecture with invitation workflows and role/permission management.
- Integrated Mono webhooks to automate loan repayment tracking, reducing manual reconciliation through real-time status updates.
- Built end-to-end two-factor authentication using AWS Cognito, including backend challenge/response flow and frontend UI aligned with OWASP best practices.
- Developed a transaction receipt system with dynamic PDF generation and streaming for seamless user access.
- Re-architected login flow to support MFA challenges and secured third-party credentials via encryption.

PROJECTS

Payment Gateway Service · Python, FastAPI, PostgreSQL, Redis, Docker

- Architected a payment system supporting Authorization, Capture, Void, and Refund workflows with high data consistency and reliability.
- Implemented retry logic using exponential backoff and jitter, combined with token bucket rate limiting to handle upstream failures.
- Designed a multi-stage idempotency layer with recovery tracking to prevent duplicate transactions under concurrency and failure conditions.

AI-Powered Email Template Builder · Next.js, GrapesJS, Gemini AI, PostgreSQL, Drizzle

- Integrated Gemini AI for natural language-driven template generation.
- Built a drag-and-drop email editor with MJML plugins for cross-platform compatibility.
- Implemented Next.js server actions and API routes for efficient data handling and mutations.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Backend: FastAPI, NestJS, Flask

Frontend: Next.js, React, HTML5, CSS

Databases: PostgreSQL, Redis

Security: Two-factor authentication, encrypted credential storage, secure API design

Cloud & Auth: AWS (Cognito, SES), GCP

Tools: Git, GitHub, GitLab, Docker

Integrations: Mono, webhook systems

EDUCATION

B.Tech, Food Engineering · Ladoke Akintola University of Technology (LAUTECH)

2020 – 2025 · *First Class Honours* — CGPA: 4.77/5.00

- Best Graduating Student — 1st in Department.
- Federal Government of Nigeria / NNPCL Scholarship Recipient.
